24th February, 1960.

COCOM Document No. 3892B

COORDINATING COMMITTEE

MEMORANDUM BY THE ITALIAN DELEGATION

EXCEPTION REQUEST FOR THE EXPORT OF BEARINGS TO POLAND

The Italian authorities have received an application to license the export to Poland of 3 roller bearings covered by Item 1601, and valued at \$ 2,581.

The bearings involved have a dimension of 560 mm. and are intended to be installed on the mobile parts of condensation equipment. These bearings are under embargo solely on account of their dimensions.

Considering the very small number of parts, purely civilian in use moreover, the Italian authorities would like to license this application, and therefore submit this case under the special procedure applied to Poland.

The Italian authorities would be grateful if other delegations would give early views on this case, by March 9th, 1960, if possible.
